

Hymax15

Oil cooler for hydraulic drive

Alfons Haar

Earn more with your Hymax15

Weight and space are important points in the truck industry. Those advantages earn money for all users of such trucks, because they carry less weight. Petrol consumption and expenditure is reduced, payload is increased. Additional space for other useful equipment like bigger petrol tank or/and tool cabinet becomes available.

Hymax15 requires only 238 mm installation width. Heat dissipation of 15 kW, oil tank volume 11 l, max. pressure 350 bar (g.) are achieved.

Compare these data - are they not unique?

Hymax15

Oil cooler for hydraulic drive

Alfons Haar

Technical Data

max. Pressure:	350 bar (g.)
Oil flow:	80-140 l/min
Weight:	46 kg
Width:	238 mm

Safety comes first, therefore we offer:

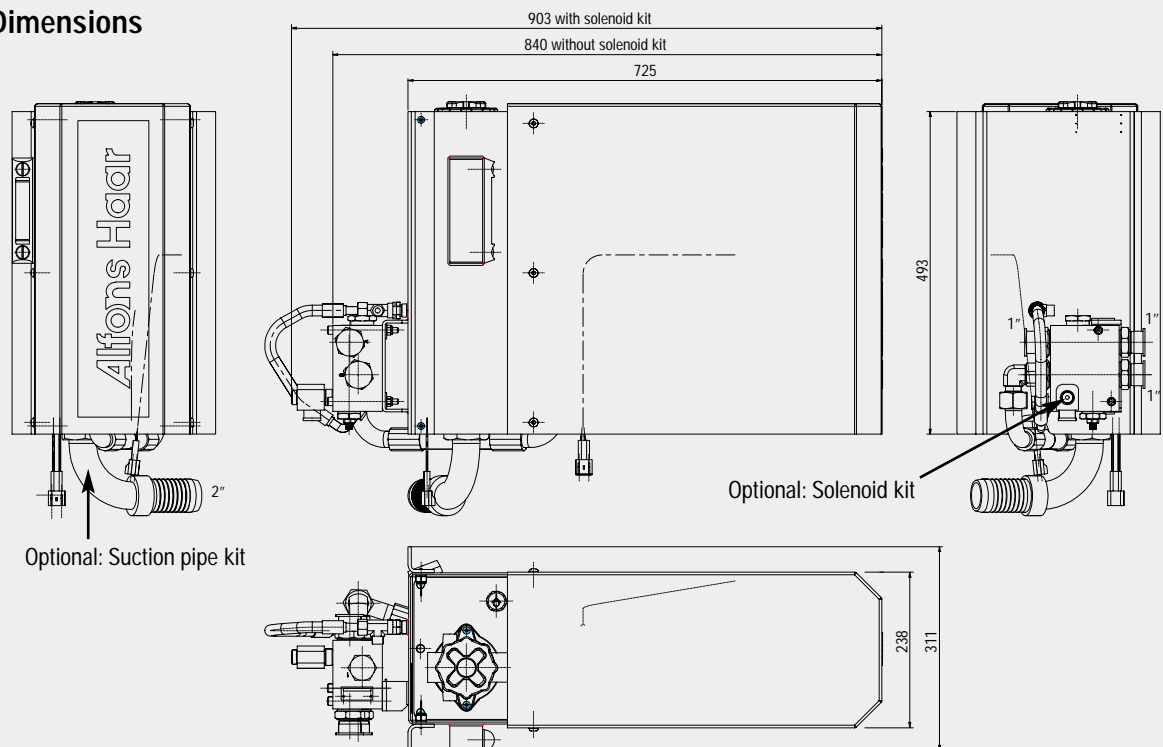

Integrated: Thermal switch
Oil temperature indicator
Level indicator
Filtered oil return

Optional: Solenoid valve
Signal transmitter
Suction pipe

recommends: Install the solenoid valve - a real protection for your hydraulic drive!

Dimensions

Fan: Electric driven 24 V DC

Weight: Approx. 46 kg
